**IMPORTANT: Name changes do not work on the EA version of the game. This is not my fault, it's due to the encryption of the EXE in that version.**

Hi everyone, today I am introducing my first season mod for the F1 games!

This mod is designed to be compatible with most other mods, allowing you to install custom liveries on top of this. However, there may still be some incompatibilities.

**What's Included**

- 2026 driver line ups for the F1 category
- 2026 teams for the F1 category
- Cadillac replacing the Konnersport Team
- Correct driver numbers for 2026

**Known Issues**

- The three letter abbreviations show the incorrect driver names. This I cannot fix.
- Sergio Perez has no audio name on the grid rundown. I am not sure why this is, I think the files are missing from the game.
- Engine sounds are not swapped (e.g. Audi will still have Ferrari engine sounds).
- Name changes do not work on the EA version of the game

**Frequently Asked Questions**

---

How to install?

Spoiler: Option 1: SERPs Launcher

Spoiler: Option 2: Manual Installation

Is this mod compatible with MildtDesign's Cadillac and Audi mods?

- Yes, this mod is fully compatible with those. They will override the included Audi and Cadillac liveries.

Why do the names not change?

- Name changes do not work on the EA version of the game. If using Steam, ensure you are using SERPs Launcher v3 Beta v0.42 or later.

Can I use other mods with this mod?

- Yes, the majority of mods should work although some may cause issues.

Does this mod work online?

- No, unfortunately mods can not be used online.

How can I report bugs?

- Post on the discussion section to explain the issue, ideally with screenshots. Alternatively, do this in my discord server.

Incompatible with Grand Prix (crash before track loading screen). Installed with Launcher, then retried manually.

**BIKER7202** Which track and driver? Also are you on steam or EA?

The mod is working great. But I do have the same issue as someone specified earlier. Skins of MildT Design are compatible but I still get infinite loading on home screen. I have serps V3 launcher and am on steam version. A help would be appreciated.

**BIKER7202** Do you get the infinite loading without MildT's mod?

The mod worked, but it does not load the new car skins. Doesn't the Mod already come with skins?

Works great overall, no bugs that are not stated in the patch notes.

Although, does anyone know if any skins is compatible yet ? (Tried MildTDesigns' ones, but loads infinitely via SERP)

**BIKER7202** MildTDesigns skins are compatible with this mod, so you must've installed them incorrectly

Almost everything is working, except for all the names. hadjar still tsunoda, lindblad still hadjar, both konnersport and its drivers still, and audi still kick. but still a good mod. i'm on steam btw

**BIKER7202** Have you used the SERPS launcher (or manually enabled names)

Hello in general the Mod is working without the real names (Hadjar etc.), although I use the Serp Launcher. And the game is crashing everytime when I want to Start a Grand Prix. Do you know how I can fix that. Thanks!!

**BIKER7202** Hi, are you using the SERPS Launcher version linked on the post?

Also, which track(s) are crashing? I haven't encountered it

Hello, thanks for the mod, somehow bottas and perez names are still original konnersport driver, i did install it via serp launcher, any instruction i forgot maybe?

**BIKER7202** Make sure you are using SERP Launcher V3. Also the Names only work on the Steam version, so make sure it is not the EA version

Excellent. Could you give a guide on how to do this yourself? i kinda wanna put kmag back in the game. Or zhouchacher, the legend who scored points in the 2024 sauber

**BIKER7202** I have effectively just swapped the faces of different drivers and modified the names. I haven't actually swapped them. I believe KMag and Zhou's faces are in game though so you should be able to do it.

how does this interfere with career mode if i have big transfers and such??

**BIKER7202** It will swap the specific drivers, so if for example you had Tsunoda in a Ferrari, Hadjar would now be in the Ferrari.

hi very great mod! everything changes but the name, how can i fix that? and also can i use other audi & cadillac liveries on top of your mod?

**BIKER7202** If you install via the SERPs launcher the names will work

If you are doing it manually, you will have to follow this tutorial:

[https://docs.google.com/document/d/1NAP4flubPksC2nnoSOIIOKgl3f7dAQuKr4Gp\\_W65Ze8/edit?usp=sharing](https://docs.google.com/document/d/1NAP4flubPksC2nnoSOIIOKgl3f7dAQuKr4Gp_W65Ze8/edit?usp=sharing)

As for the Cadillac and Audi skins, yes you should be able to install skins on top. I know that MildTDesigns Audi & Cadillac skins work. They may mess with the name changes though.
