BROWSER PROTECTION

Netcraft's free browser extension provides real-time enhanced protection from malicious sites defending you from phishing, fake shops, and malicious scripts such as JavaScript skimmers and cryptocurrency miners.

The browser extension works with all major browsers, including Chrome, Firefox, and Edge.

MOBILE PROTECTION

Two-thirds of phishing attacks target mobile users via email and SMS. Many mobile browsers lack complete phishing protection. The Netcraft app extends desktop-level security to your smartphone, instantly blocking new threats. Quickly report suspicious sites and track their status directly within the app. Stay protected wherever you browse.

EMAIL PROTECTION

Netcraft's free email extension allows you to submit suspicious emails with a click of a button. All emails are automatically analyzed against Netcraft's malicious site feeds, protecting millions of users.

The extension runs on Outlook desktop, Outlook Web App, and Gmail.
