

What's new in DU Meter?

October 13, 2025 :: DU Meter 9.0 has been released.

- Enhanced support for Windows 11 25H2 and Windows Server 2025.
- A refreshed color palette for improved harmony with Windows 11.
- Smoother font and chart rendering.
- Improved hi-DPI scaling when multiple monitors have different DPI settings.
- Enhanced support for ultra-high definition monitors (6K and above).
- Updated dependencies for enhanced security.
- Improved installer process: installation now aborts on unsupported CPU architectures.
- Miscellaneous bug fixes and minor improvements.

Upgrade Policy

If you bought a DU Meter license in 2025 or later, your serial number will be accepted by DU Meter 9. Otherwise you need to [buy an upgrade](#), and you're entitled to a significant discount from our current DU Meter price. To upgrade from any previous version of DU Meter, it is sufficient to simply install the latest version on top of the previous one, *without* uninstalling. DU Meter will import accumulated statistics and retain user options.

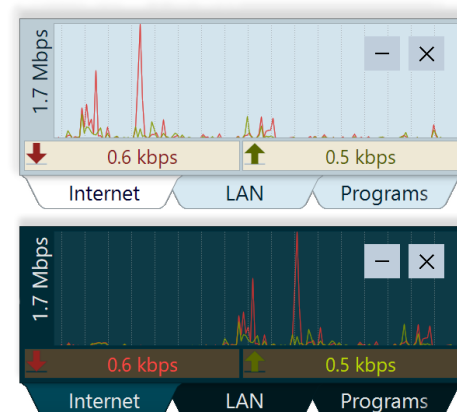

[DU Meter 8.x updates history](#) and [DU Meter 7.x updates history](#) are also available for your reference.
