F1 2026 Mod – New Era Edition

The wait is over... a **new era of Formula 1 has arrived**.

F1 2026 Mod – New Era Edition is a complete transformation of F1 2014, bringing the next generation of Formula 1 into the game like never before. Built on the foundation of the highly successful 2025 mod, this edition pushes realism, immersion, and gameplay depth to an entirely new level.

This is not just an update — this is a full evolution of the mod.

WHAT IS THIS MOD?

This mod fully converts F1 2014 into the **2026 Formula 1 season**, delivering a modern F1 experience with updated content, gameplay systems, and presentation.

The base game has been heavily reworked — from cars and tracks to AI and handling — to create one of the most immersive F1 experiences possible on this platform

WHAT'S INCLUDED?

FULL 2026 SEASON CONVERSION

- Updated teams, drivers, and performance data (Welcome to Formula 1, Audi and Cadillac)
 - New era regulations reflected ***as closely as possible*** in gameplay and balance
 - Refined competitive order based on latest developments
-

GAMEPLAY & HANDLING EVOLUTION

- Completely reworked handling model for better realism and control
 - Improved car balance, traction, and cornering behavior
 - Clipping depicted in the game as closely to real life as possible, amid the limitations of the original game
 - Track stats for each track which means a different type of handling and setup approach
-

AI SYSTEM IMPROVEMENTS

- Smarter and more competitive AI behavior
 - Better racing lines, braking points, and overtaking logic
 - Improved consistency across all tracks
 - More dynamic and unpredictable race scenarios
-

TRACKS & ENVIRONMENT

- Updated circuits with refined layouts and visuals
 - Expanded track roster with real-world accuracy (currently there are **37 tracks**, all brought over from the 2025 mod, with more expected to be coming later)
 - Improved trackside details, lighting, and atmosphere
-

GAME MODES & FEATURES

- Revamped Evaluation Mode
 - Improved progression and replayability
-

VISUAL & AUDIO OVERHAUL

- Updated liveries and car models
 - Improved lighting, shaders, and effects
 - Enhanced UI and presentation
 - Updated soundtrack, race intro, and post-race audio
-

HOW TO INSTALL THE MOD?

Installation over original F1 2014 game is highly recommended. Always back up your original game files before installing.

✓ REQUIREMENTS:

- A clean installation of **F1 2014**
 - Make sure the base game runs properly before installing the mod
-

METHOD 1: Drag & Drop

1. Open the downloaded RAR file
 2. Navigate to your F1 2014 installation folder
 3. Drag all mod files into the game folder
 4. Select **Overwrite Files**
-

METHOD 2: Manual Extraction

1. Open the downloaded file
 2. Locate your F1 2014 directory (e.g. C:\Game\F1 2014\)
 3. Extract each folder into the game directory
 4. Replace all existing files when prompted
-

IMPORTANT:

- Do NOT delete any original game files
 - Do NOT remove original tracks
 - A **new save file is required** (old saves will not work with the mod)
-

IMPORTANT NOTES

- This mod is designed for offline play only
 - The mod is currently supported in English only
 - Some features are limited by the F1 2014 engine
 - For best experience, use recommended settings and clean installation
-

KNOWN LEGACY ISSUES

The following issues already existed in the previous season mods and are still present due to long-standing F1 2014 engine/modding limitations. These are not new issues introduced by the 2026 mod.

- **New track AI behavior is not always perfectly smooth**, especially during race starts.
- **The penalty system on new tracks can be extremely strict**, so players must stay within the white lines as much as possible.
- **Replay cameras on some new tracks may occasionally be bugged.**
- **New tracks do not have object shadows** due to the hard-coded file structure of F1 2014.
- **Do not accelerate time**, as it may cause unrealistic lap times in qualifying sessions.
- **One-shot qualifying may cause AI drivers to retire for no reason on some tracks.** Turning off damage is recommended if this occurs.
- **Career Mode is not recommended**, as it behaves similarly to Grand Prix Mode but with more limitations.
- **Converted car chassis may cause a black screen or suspension bug when the player is hit from behind.** This is a well-known issue with no current solution.
- **Mobile emulator issues are outside the scope of this mod**, as F1 2014 was never designed for mobile devices.

Note: These issues have existed since earlier versions and remain extremely difficult — or currently impossible — to fully fix within the limitations of the game engine.

FINAL WORD

This project is built with passion for Formula 1 and the modding community.

The goal is simple: to push F1 2014 beyond its limits and bring the **next generation of Formula 1** into the

game.

Very good mod and i love the fact the battery affects speed is great

Bellek99 · Saturday at 13:22 · Version: 5.0.0 HF1V2

The mod works great. Nonetheless, I do think the battery feature is a little bit broken since you can just race in 7th gear as top and be faster than AI since you don't lose any speed (Is AI speed also affected by this feature?). I also think the RPM are not representative of the actual speed or RPM in the car. I found myself upshifting before it was due because of the RPM gauge and failing to get top speed for that gear.

I hope you take this as positive feedback. I really enjoy the mod and I hope you continue working on this project!

Thang Nguyen because that's the way to include the superclipping into the game. there's an option to include the handling without it.

Aún no he probado el mod, pero estoy seguro de que no va a decepcionar. Haré el correspondiente video en mi canal de YT y también en mi cuenta de tik tok para mostrar el esfuerzo y el trabajo de todos ustedes, chicos. Muchas gracias por traernos siempre lo mejor de lo mejor y permitirnos disfrutar de la F1 cada temporada. Un abrazo. Los amamos.

The mod is AMAZING! Very loved Gameplay, especially car handling and super clipping like a b*st*rd on 2026 regulation. Very very like it!

Thang Nguyen thanks bro!

This is honestly a wonderful game. You even added battery details like in F1 2026 — it's really amazing. I was going full speed on a straight and suddenly the car started slowing down, I was like "wtf" 😂 Incredible.

Just one thing I think hasn't improved yet: some tracks like Miami are bugged and don't open, which prevents you from finishing the championship.

But overall, the game is great — 10/10.

Thang Nguyen about the bug of the non original tracks not working, reopen the game and do that race immediately, don't do another race before, even in time trial

Absolutely sensational mod, huge respect for bringing F1 2014 modding to life. And I promise - there will be even better things to come in the future! A new dawn for the F1 modding scene. Thank you!

Thang Nguyen thanks bro! this season mod comes way earlier than last season because all the needed tracks are ready 🙌
