Its great but free one is so limited!

For example in spreadsheets, if you use a custom formula i.e. on a cell =2+3+4 after a couple if tries, it will say only possible in prof edition which means i cannot keep adding more values to the cell if you know what i mean.

WPS Office 2016 beta v10.1.0.5452

28 January 2016 14:23, Nelson André Hofer de Carvalho

(Sorry my english).

I am testing WPS Office 2016. So far I can safely say that is excellent. It's exceeded my expectations. Probably I shall adopt it.

The features it provides are useful and efficient.

Compatibility with MS Office is also good.

The spreadsheet works well automaticity.

I not yet tested the WPS Presentations.

The question is the value of sales and support.
